HackBackBetter

About Us

HackBackBetter 2023 is a hackathon hosted by students, for students. Our team of highly skilled cross-discipline local high schoolers, working as partners to CompassPoint Mentorship, a 501(c)3 nonprofit, will offer a variety of workshops, activities, and resources to help participants grow and succeed.

What is a hackathon?

Traditional hackathons are just that: Traditional. Usually, hackers just work tirelessly throughout the whole day/days to make a half-finished and lackluster product at the end. We won't do that. At our hackathon, we will encourage our participants to join activities other than coding, like snack & chill sessions and enriching workshops to learn from – and maybe even teach – others.

What do you get?

Below are a few of the many benefits that being our sponsor can bring you. For the full list of benefits, please take a look at our tiers starting on page 7.

Community Outreach

Community comes first – always. By sponsoring us, you'll show that you truly care about your local developer communities.

Brand Awareness

A new generation is coming – let them know just how great your services are! By sponsoring us, you'll have the valuable opportunity to spread your company's name and services to a crowd of STEM-focused youth.

Inspire the future of tomorrow

The future is here – and you have a chance to shape it. Inspire our participants and help them realize just how important STEM and CS are to the future!

Sponsorship Packages

HackBackBetter
